

Church  
Windows

**What's New**

Church Windows Version 17.14.0

(9/14)

- Running Church Windows from a workstation will require a network license.
- Unique user names/passwords are required - two people may no longer log in at the same time using the same user name.
- Anyone using Church Windows must know both a user name and password. The list of user names will no longer be displayed.
- One Call Now will no longer be supported from within Church Windows, but you will still be able to export a file to it.
- Although all denomination-specific fields will be converted, the Church Windows opening screen will no longer display denomination titles and you will not be able to reinstall denomination-specific versions.
