

Accounting

- Improved exporting of reports to Excel format.
- Deleting of future accounting years without transactions is now permitted.

Accounting and Donations

- If Accounting or Donations is restored separately from the other, invalid transfers can result. The list of invalid transfers is now printable.

Donations

- If an import file contains negative donations, the list of these donations is now printable.
- Certain errors in custom Donation Statement layouts are caught before they can pose a problem when printing.
- Improved sorting on the Auto-Assign Giver Numbers screen.
- On the Browse Transactions screen, it is easy to see the Donations date range.

Donations and Membership

- Email logs are now easier to access and print and contain more information.
- Emails are now sent in alphabetic order so that it is easier to determine where it left off if a problem occurs during sending.
- Email is now sent in a way that does not interfere with other processes, so that work can continue in the program even when emails are sending.

Membership

- The option to sort dates in year/month/day order vs. month/day order has been moved to the Sort tab for easier access.
- Anniversary lists will no longer duplicate emails sent.
- Age and Years Married calculations will now be based on the last day of the month selected for more accuracy on reports.
- Improved Personalized labels on Custom reports.
- On Custom reports or Directory layouts, space is not left for pictures if no picture is available for a record.
- Added the ability to print birthdays without the year on labels.
- A local area code can now be excluded when printing phone numbers on reports.
