

### Version 20.17.3

#### Membership

- School grades can now be ordered from the drop down on the People screen.
- Reports – when querying for dates, the Date Selector will now allow you to look for dates with unknowns (?’s) in them.
- On the group assignment screen, you can now filter dates by date range.
- Speed improvements for loading large amounts of data.
- Various bug fixes

#### Donations

- When correcting a donations batch. Reversing and correcting transactions will now have the same Post Time so that they remain in the same batch.
- Various bug fixes

#### Accounting

- The system will now record when and who ran Update Beginning Balances.
- Budget report will handle long account numbers better.
- Various bug fixes

#### System

- There is now a command line backup utility for those who wish to automate their backup process. For instructions, type “CommandLineBackupUtility /? “ at a command prompt set to your Church Windows folder.

### Version 20.17.2

#### Membership

- Inactive groups can now optionally be excluded from the Setup Groups/Classes report.
- Various bug fixes

#### Membership/Donations

- Future selections for groups/classes and giver numbers will now include those with no end date on their group membership.

## Accounting

- Bug fixes

## Version 20.17.1

### Membership

- Selections for Groups/Classes can now be based on a date range.
- Group membership can now start and end on the same day.
- The Person Lookup drop down, now also shows address.
- Additional Membership Report templates are now provided.
- Indiv/Family pictures tab on Membership Settings screen can now handle more images.
- Various bug fixes

### Donations

- Vanco donations transactions can now be downloaded via their web services from within Church Windows.
- Importing donations from any service will now check to see if a donation has already been created for each item in the download. Duplicate donations will not be created if present.
- Improved functionality when looking up a person by giver number in a giver lookup.
- Various bug fixes

## Accounting

- Various bug fixes

## All Modules

- Improved zoom level defaults and saving for print previews

## Version 20.17.0

### Membership

- This module has been completely re-written, previous functionality has been maintained, plus the following additional features are now included:
  - Members/Visitors designations are now user-defined categories that can be filtered on, added to, changed, and deleted
  - Next/Previous buttons can now move through families in alphabetical or numerical order
  - All Addresses (main and alternate) now have a third address line, can be marked as unlisted, and include a Country field
  - Added the ability to designate which address should be used for Donation Statements
  - Bulk mailing fields are now available to view/edit
  - Optional, automatic fill in of City/State using internet zip code lookup
  - City and State are now separate fields
  - Up to three alternate addresses can be stored each for households and individuals
  - Alternate Addresses can now be for a one-time date range as well as repeating from year to year

- Added duplicate name checking on new entries. Church Windows will let you know if the name being typed is already in the database.
- Added the ability to link children from one family to another, so if a child lives in more than one household, they can be shown in both
- All phone fields can better handle international phone numbers, can handle extensions, and can be marked as unlisted
- Any email field can be marked as unlisted
- A photo can now be associated with a family as well as individuals
- Last Attended Date, Last Visit Date, Last Giving Date, Date Created, Created By, Last Updated and Updated By fields can be shown on the individual record
- The Directory/Report Order field is now required for new individuals, which makes reporting more consistent
- A User-defined checkbox type field is now available for custom fields
- Fields can be set up as required so data is assured to be complete
- **Find Grid**
  - The Find Grid can be opened without opening the People screen first
    - It replaces the Contact List, just click Find then Next
    - It can now show all Family Categories (Member, Visitor, etc) at the same time
  - Improved Find provides the same filtering flexibility as reporting
  - Multi-row selection is now easier with checkbox selectors
- **Groups/Classes**
  - Any group can be marked inactive
  - All or specific Membership groups can be hidden from Donations
- **Advance Groups**
  - Teachers can be omitted from the advancing process
  - Roles will advance with the group members
- **Advance School Grades**
  - All Grades can now advance in a user defined order
- **Reporting/Email**
  - Allowed for the emailing to parents of selected children
  - Family Photos can be used for Directories
  - Children who are linked to other families can optionally print with their linked families

## Donations

- Donation batch corrections which affect different accounting accounts will be available for transfer even if they have a \$0 change
- Various bug fixes

## Accounting

- New 1099 and 1096 tax forms
- Clarity improvements to the Close Accounting Year process
- Various bug fixes

## All Modules

- Backups can now be saved to the root of an external drive
